

THE PEKAPEKA JOURNEY

PekaPeka was originaly developed as part of a citizen science project monitoring native birds, sponsored by Mitre10 Dunedin. After the success of the project PekaPeka grew into a startup and was entered into the student buisness competition Audacious and won.

Now we are able to share our native bird feeding system nationwide through Mitre10 retail stores and online at the Predator Free website

TUI BELLBIRDS SILVER EYES

PekaPeka also gives you the ability to target multiple species of native bird at the same feeding station.

Sugar water accomodates nectar feeding species such as the Tui and Bell birds, while a hook on the underside of the platform allows the user to hang type of bird feeder, from a home creation to the PekaPeka aproved Top Flite feeders.

PORTABLE AFORDABLE

The ability to be used in conjuntion with a waratah gives bird lovers the freedom to place PekaPeka almost anywhere, it can be easily installed in lawns, garden beds, screwed to posts and decks and even placed in a plant pot. This is important as accessability and ease of maintinance is essential to enjoying the bird feeding experience.

NEW ZEALAND MADE

PekaPeka designed and manurfactered in New Zealand, provides a safe and customisable feeding experience for you and your birds.

Predator resistant, easy to install and cost effective.
